

Fisher & Thompson Brings Value To Dairymen Through Increased Profits, Problem Prevention

Andrew Laffey

Glenville Farms

Cochranville, PA

Twice a month for the past 4 years, Pat Evans from Fisher & Thompson has visited Glenville Farms to do analysis, testing and inspections to help the dairy reach its milk quality goals.

Higher Profits

“The biggest benefit we’ve noticed is increased profits due to quality premiums from our co-op for our milk quality...that’s the big one right off the bat. Another big benefit is improved cow health and lower cell counts due to fewer instances of mastitis. Fisher & Thompson has definitely helped us have a competitive advantage.”

Fisher & Thompson Service

“The quality of service we get from Fisher & Thompson is a big factor. No one has the level of service that Fisher & Thompson has and that’s a big reason we use them.”

Brubaker Farms

Mt. Joy, PA

Fisher & Thompson has made monthly visits to Brubaker Farms for several years, helping the dairy avoid major equipment and system problems.

Problem Prevention

“Without a doubt the prevention of problems is the biggest benefit for us. At different times Pat from Fisher & Thompson has found small problems that could be easily fixed before they became big problems.”

Economic Benefit

“The service we get from Fisher & Thompson definitely provides an economic benefit. If we can prevent problems with the system washing and the cow hygiene end of things we’re able to capture more bonuses and that’s the bottom line right there.”
